RE: Snowflake Reclamation Site - Utah

This site was included in the purchase of the Basin plant and claims of 2005. Basin had apparently taken some bulk samples out of the site and had some heavy equipment moving dirt around. Creating an "eyesore" for some years, however Basin had made no move to reclaim. It.

The fall of 2006 I went to the site to inspect the area and determine what would be required to reclaim it and release any financial assurance liability we inherited from Basin.

The area was determined to be 2.64 acres and had a deep pit and mounds of material around the outside area of the pit as well as some dozer "gashes" that were pretty deep. There were also several areas cut out of the side of the hill on the backside of the site.

In May of 2007 I contracted to have the dirt work done, blending the slopes and filling the pit. This work was in a remote area and due to that fact, cost for the dirt work portion of the reclamation for the 2.64 acres was \$9,000.00 which included the mobilization and demobilization of the equipment.

During the summer of 2007 there was a very large wildfire in that area, that burned over 400,000 acres. The Snowflake site was included in that burn. All brush and trees were totally destroyed.

In early October of 2007 we went onsite and planted a seed mixture recommended by the man in charge of seed for the BLM in that area, Harvey Gates: The seed mix:

Indian Rice Grass	5 lbs/Acre
Hycrest Crested Wheatgrass	5 lbs/Acre
Great Basin Wild Rye	5 lbs/Acre
Shadscale Saltbush	2 lb/Acre
Ladak or Spreader Alfalfa	2 lb/Acre
Yellow Sweet Clover	2 lb/Acre
Bud Sage	1.5 lb/Acre
Upland Greasewood	0.10 lbs/Acre

This totaled 22.06lbs/Acre of seed. Cost of the seed was \$213.74/Acre, or \$564.27.

Total cost of the reclamation of that site was \$9,564.27, or \$3,622.83/Acre.

0002

Utah allows a 3 year growth period from planting to site review. Since this was planted in 2007, it was not due for review until fall 2010, however a review May 27, 2009 showed positive results on the site with the potential for returning to "natural" imminent. This area is on par with or ahead of the area planted by BLM after the fire.
